Most of BOCON's customers are in industrial control field. We focus on Embedded Analog Modems and External Modems.

We'd love to know your market information about this, and want to find some opportunities. We received a lot of e-newsletters about your new products, many of them are just used in USA and Europe. What's your marketing position for these new products, please? May we know your schedules of new product roadmap?

Would you share your performance and activities for Embedded Analog Modems and External Modems all over the world, too?
